

Brush Boxes for Cable Conveyor Maintenance

Side Access Brush Boxes

For easy cleaning and cable conveyor maintenance of your tubular drag conveyor, consider integrating Cablevey's side access brush box.

A brush box is simply a housing that the cable and discs pass through that contain roller brushes removing particles that cling to the discs and cable. This easy-to-install unit will save you time and labor in your cable conveyor cleaning regimen.

5 Reasons to Use a Side Access Brush Box

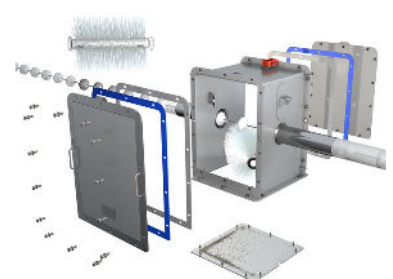

Cablevey has improved the convenience of cleaning and cable conveyor maintenance by the introduction of the side access brush box. The side access brush box presents some of the following advantages including:

- | | |
|----------------------|--|
| Dual Access | Access from both sides, rather than only the top for easier maintenance of internal parts. |
| Visibility | With covers mounted on each side visibility of internal parts is granted, allowing you to see the brush box running in real time. |
| Easy to Clean | Maintenance personnel can easily disassemble and clean the brush box, especially with low ceilings and other overhead obstructions. |
| Save Money | Easy disassembly means less maintenance time to lower cost. This also serves to decrease system downtime. |
| Longer Life | A UHMW bushing has been added to increase wearable surface by three times prolonging life of bushing, resulting in less maintenance of internal parts. |

Specifications

Dimensions	6" Length x 28" Height x 19" Deep
Weight	140 lbs. approximately
Material	Mix of Stainless Steel, UHMW, Polycarbonate
Power-Source	None
Included Components	Brush Box, Brushes, Covers & Safety

*specifications can change without notice.

Frequently Asked Questions

Will I need any special tools to open the side access brush box?
No, special tools are required to open the side access brush box. A wrench is needed to open, same as the standard brush box

If I already have a standard brush box, would I need to purchase a whole new one for side access?
Yes, a new one would need to be purchased, as the frames differ from the standard brush box to the side access brush box. The side access brush box comes fully welded and assembled upon delivery.

Is the side access brush box food grade compliant?
Yes, the side access brush box components are designed to comply with food grade standards.
