

Cablevey Conveyors

8" Systems

8" Cable Conveyors

Typically used to convey:

- Mixed products
- Nuts
- Extruded snacks
- Baked goods
- Chips
- Popcorn

System Capacity:

- 8" (203.2mm) tube diameter
- Moves up to 2,000 Ft³ (56.6 M³) / hour
- Moves up to 80,000 lbs /hour (36,287 Kgs/hour)
(depending on bulk density of materials)

High-Volume Cable Conveyors

8" (203.2mm) diameter high-volume cable conveyors can be customized to move just about anything. Examples include pet food, powders, in-shell walnuts, peanuts and puffed rice breakfast cereal. These systems are designed to handle high volume and can operate on multiple planes.

With our 8" tube conveyor systems, you can expect:

- Gentle material handling
- Enclosed dust-free environment
- Easy maintenance
